Customizing the “My home” page in webCampus

In webCampus you can easily customize your My home page. With one click, you can access the courses that are most important to you today and see any pending activities in each. Here’s how to customize your My home list of courses:

In the purple header bar, click My Courses, or in the Navigation block, click on My home (Figure 2).

Your list of currently enrolled courses will appear.

Click the Customize this page button (upper right-hand side of page).

To reorder the list of your courses, click on the Move icon next to the course name. Drag and drop the course where you want it to appear.

Note that you can see a list of pending activities in your courses by clicking on the icon next to the You have _______ that need attention statement – assignments, in the case of the example shown here. Each item listed includes a link that will take you to the activity.
Hidden courses are indicated at the bottom of your course list. To unhide your courses, click (Show all courses) at the bottom of the course list, or change the Number of courses to display option to Always Show All from the drop-down menu.

To hide courses that you do not wish to see displayed on your "My home" page, use the pull-down menu to select the number of courses you would like to have actively displayed.

Click on Stop customizing this page to save your changes.
